

Kizen Education CRM — Phase 3 Final Handoff Report

Version: Phase 3 Final Production Release | **Date:** July 23, 2026 | **Database:** Supabase Project
`zmqvjtenuxlvwfpfroc`

Executive Summary & System Architecture

This document contains the complete technical specifications, database architecture, data integrity audit results, and hosting deployment models for the **Kizen Education CRM (Phase 3 Final Delivery)**. The platform was built using React 19, TypeScript, Vite, TailwindCSS, and Supabase PostgreSQL with Row-Level Security (RLS) policies. It has undergone a 100% automated data accuracy audit and zero-error TypeScript compilation verification.

1. Data Accuracy & Integrity Test Results (28 / 28 Passed)

Test Domain	Verification Scope & Description	Status
Lead Data Lifecycle	CRUD accuracy, status transitions, temperature tags, hard/soft cleanup.	10/10 PASSED
Student & Fee Math	Auto-IDs (KIZ-2026-xxx), computed net_fee, pending_balance, payment sync triggers.	13/13 PASSED
Live DB Reconciliation	Verified 793 Leads, 20 Students, 20 Fee Records, 36 Installments, 8 Active Users.	5/5 PASSED
Production Build	Strict TypeScript compile (`tsc -b && vite build`) — 0 errors in 7.83s.	0 ERRORS

2. Implemented Modules & Phase 3 Final Upgrades

- **Lead Management:** Kanban board, hot/warm/cold tags, source tracking, counselor allocation.
- **Student Profiles:** Unified profiles containing academic details, father's name, family contacts, and admission records.
- **Fees & Installments:** Discount math, UPI/Bank Transfer/Cash restriction, GST invoices & printable PDF receipts.
- **Interactive Calendar:** Integrated month/week/day agenda view for follow-ups, fee due dates, and demo classes.
- **Security & Password Reset:** Owner password reset modal for any team member + self-service credential updates.
- **Audit Logging:** Real-time tracking of login timestamps, password updates, and role adjustments in Owner Activity Log.
- **UX Luxury Upgrade:** Dark glassmorphism login UI with official Kizen & SAGEDO branding and 1-click instant login.

3. Hosting & Database Infrastructure Options (2026)

Option	Stack / Infrastructure	Est. Cost (INR / Mo)	Best For
Option 0 (Free)	Vercel Hobby + Supabase Free Tier	■0 / mo	Launch testing & small initial load.
Option 1 (AWS India)	AWS Mumbai Region (`ap-south-1`) + Supabase	■1,999 – ■2,499	100% Indian DPDP Data Sovereignty (Used by LeadSquared).
Option 2 (Managed)	Vercel Pro + Supabase Pro (\$45/mo)	~■3,730 / mo	Zero maintenance, daily backups, 99.99% uptime.
Option 3 (Indian VPS)	Hostinger India / DigitalOcean Bangalore	■999 – ■1,499	Dedicated Indian KVM VPS with ultra-low latency.
